EXPERIENCE

Tkxel, Lahore — Senior Software Engineer

May 2023 - PRESENT

- Developed a multi-tenant contract management platform integrating HubSpot for company and deal data synchronization.
- Built multi-step contract workflows supporting services, devices, payment terms, signees, and enabled addendums and renewals to create new linked deals.
- Implemented contact and role management features, allowing companies to define custom roles and contacts for deals and contracts.
- Delivered a scouting module to track and manage officer shifts and assignments, enhancing operational visibility across locations.
- Applied best practices for state management, ensuring scalability and clean handling of nested relational data in React.
- Collaborated closely with backend teams to define API contracts and optimize data fetching strategies for nested data structures.

Taro Technologies, Lahore — Software Engineer

March 2022 - May 2023

- Built BNPL features including installment scheduling, due reminders, and order request flows.
- Developed a real-time car auction system using Pub/Sub and Socket.io, enabling live bidding with countdown timers.
- Provided real-time bidding stats and ensured high availability through Node.js clustering.
- Optimized database queries and schemas to improve performance across PostgreSQL and MySQL.
- Created internal NPM packages and implemented secure auth strategies using JWT and session tokens.
- Integrated payment systems: Stripe, PayPal, and Apple Pay for smooth e-commerce checkouts.
- Implemented media uploads to AWS S3 and built Cron jobs for background tasks.
- Developed frontends using React.js and TypeScript for internal tools and user-facing platforms.

Backend Dev Skills

Node.js, NestJS, [Express.js](#), Typescript, Javascript, Entity Framework, Microservices, Restful, Ruby on Rails, Redis, Sidekiq, Mysql, Postgresql, MongoDB, Amazon RDS, Dynamodb, ORM, Sequelize, TypeORM, Mongoose, Stripe, Paypal, Socket.io, JWT

FrontEnd Dev Skills

React.js, Vue.js, JQuery, Javascript

DevOps

Amazon Web Services (AWS), Ec2, S3 Buckets, Git, GitHub, Netlify, Vercel

Other Tools

Jira, ClickUp, Trello, Asana, Monday.com

Languages

Urdu, English

Hobbies

Foodie, Traveller, eGaming, Table Tennis

Kryptomind Inc, Lahore — Associate Software Engineer

June 2020 - March 2022

- Built a real-time chat system using Pub/Sub and Socket.io, enabling instant communication across clients, with support for events, presence, and message persistence.
- Implemented push notifications for critical updates and user engagement, leveraging scalable messaging patterns.
- Developed a Stellar-based blockchain wallet system, including generation of public/private key pairs and registration of users on the Stellar network.
- Enabled asset trading on Stellar by integrating custom logic to handle issuance, transfers, and trades of on-chain assets.
- Built Webhooks to sync real-time trade data from Stellar to internal systems.
- Integrated donation functionality on a Shopify store, allowing users to contribute donations per product, enhancing social impact.
- Developed media upload services for products, supporting image and video uploads to AWS S3, ensuring secure and scalable file storage.
- Built robust checkout flows for custom e-commerce experiences using Stripe, PayPal, and Apple Pay, supporting multiple payment gateways.

Stackworx, Lahore — Associate Software Engineer

March 2019 - June 2020

- Built a complete email marketing system targeting registered users, enabling automated and scheduled email campaigns, boosting user engagement and retention.
- Developed a custom e-commerce platform for a client, integrated directly with the Shopify API, allowing seamless product and order synchronization between Shopify and the website.
- Implemented real-time inventory and pricing sync between Shopify and the custom website to ensure product data consistency across platforms.
- Contributed to both frontend (React.js/TypeScript) and backend (Node.js, Ruby on Rails) development, emphasizing modular architecture, clean code practices, and performance optimization.
- Utilized ORMs like Sequelize and ActiveRecord to streamline database interactions and ensure data integrity across services.

EDUCATION

Comsats University, Islamabad — Bachelor in Software Engineering (BSE)

January 2015 - January 2019

RECENT PROJECTS
